

Environmental Policy

ABT Engineering undertakes General Fabrication; Water Jet Cutting; Machining; Dry Ice Blasting; Powder Coating and Ground Works to customers throughout Scotland and the UK. ABT is committed to sustainable operations and caring for the environment is a key element of this commitment. The Company's environmental policy covers our use of resources, recycling, the life cycle of our waste and the prevention of pollution.

The key elements of our environmental management system are designed to ensure that our environmental management system meets the requirement of ISO 14001:2015 and as a business, we manage our environmental impacts.

The company policy has been defined by the Board as follows:

- We will comply with all applicable regulatory environmental compliance requirements.
- We will ensure all personnel receive adequate and appropriate training in environmental matters.
- We will take care to ensure that any substances, which are hazardous to both health and the environment, are handled safely and correctly.
- We are committed to continual environmental improvement and the protection of the environment including prevention of pollution.
- We will strive to continually improve the effectiveness of the Environmental Management System, which is an inherent part of our Integrated Management System.
- We will ensure this Policy is appropriate to the purpose and context of the business and that it provides a framework for setting the environmental objectives and KPI's.

Our Environmental KPI's, Objectives and Targets are reviewed at our Management Review Meetings.

This Policy is communicated throughout the business, is reviewed at our Management Review Meetings and is available to the public via our website.

Paul Ross
Director

Rev 2: 19th January 2023

(To be reviewed in January 2024)
